

# NLB 225 Series Electric High-Pressure Water Jetting Systems

U.S. Patent Pending

NLB's newest line of waterjetting units are built around the innovative model 225 convertible pump. This pump, with its quick-change, in-line fluid end design, has fewer parts for increased operating efficiency and simpler maintenance. And, it requires only a simple conversion kit to operate at pressures between 8,000 psi (552 bar) and 40,000 psi (2,800 bar) .

The NLB 225 Series units are built using the same rugged, reliable designs that have been field proven for over 35 years. The skid mounted unit comes standard with features like low water pressure shut-down and a high quality electric motor starter. All operating controls, including the pressure compensating by-pass valve and pressure gauge with snubber, are mounted on a separate accessory manifold, which provides additional protection for these important components.

## ***NLB's Quick Change Fluid Ends. Simple, Fast, Easy and Dependable***

- The quick conversion fluid end allows the pump to operate at pressures between 8,000 psi (552 bar) and 40,000 psi (2,800 bar) and makes maintenance fast and easy.
- All operating controls, including the pressure compensating by-pass valve, pressure gauge with snubber, and rupture disc assembly are mounted on an accessory manifold to provide additional protection.

## Industrial Motor Drive:

Pumping system includes a TEFC electric motor and a combination non-reversing magnetic starter with fuse protection and stop/start push buttons. The system is completely pre-wired for 460 volt service and comes complete with a safety disconnect.

- Model 225 - 250 hp (186 kw)
- Model 205 - 200 hp (149 kw)
- Model 155 - 150 hp (112 kw)

### Model 205 (200 HP)

### Model 155 (150 HP)

## Unit Features include:

- Slow running plunger pump built from high-grade stainless steel and provides unprecedented reliability.
- Pump can be configured for pressures from 8,000 to 40,000 psi.
- A single accessory manifold for 8K to 24K operation with pressure gauge, rupture disc and by-pass valve.
- A water boost pump ensures that the unit constantly receives inlet water at the required supply pressure.

## Skid Mounting:

- Size: 5' 4" wide x 7' 4" high x 12' long  
(1.63 m wide x 2.24 m high x 3.66 m long)
- Weight 7,600 lbs. (3,448 kg)
- Industrial grade enamel paint

## Motor Driven Pumping Assembly:

- Slow running NLB Model 225 reciprocating pump
- Three plunger mechanical lubrication
- 125 gallon (473 l ) polypropylene water tank
- Heavy-duty V-belt drive with guard
- Inlet water filter
- 30,000 lb. oil-filled pressure gauge with snubber
- Accessory manifold with relief valve
- All necessary plumbing and operating controls

All Units Are Factory Tested Before Shipment

The NLB 225 Series pumps can be quickly converted to operate at any of the above pressures/flows with a simple plunger or conversion kit.

NLB can custom configure pump units to meet your specific requirements. This model has the motor positioned over the pump for a smaller footprint.
