

ARM

AUTOMATED REMOTE MANIPULATOR

A
**NEW LEVEL
OF OPERATOR
SAFETY
AND COMFORT.**

*Unit shown with optional features.

NLB's new Automated Remote Manipulator is a safe and effective tool for water jet cleaning. It features an operator controlled arm that can manipulate a wide range of waterblasting tools. The operator remains safe and dry within the climate controlled cab.

The ARM allows the operator to position the tooling, and then start and stop the flow of high pressure water. Multiple cleaning head options are available to best fit your application.

The ARM offers a new level of operator safety and comfort. It's automated features allow operators to work longer without experiencing exhaustion.

FEATURES INCLUDE

- Unique quick tool connection system which makes changing tooling fast and easy
- An arm which handles over 600 hp water jet tools
- Wide jet pattern for better coverage
- Improved job productivity
- Optional bundle roller kit (shown below)

*U.S. Patent Pending.
